# North American RADIO-TV STATION GUIDE

by Vane A. Jones

TENTH EDITION

This handy book contains listings of all the radio and television stations in the United States, Canada, Mexico, and the West Indies—nearly 10,000 stations in all. The over 5000 a-m stations, over 3000 fm stations, and over 1000 television stations presently in operation, scheduled to start operation soon, or temporarily off the air are each listed in three ways—by geographical location, frequency (or channel), and call letters.

This book is more than just a listing of stations, however. Important statistics, such as power (day and night for a-m stations), height of antennas (for fm stations), and sharing of time with other stations, are given. Stations with network affiliations are indicated, as are educational stations and fm stations broadcasting stereo.

Regardless of your interest in radio and television, this book is a must for you. If you are traveling, it will list the stations broadcasting your favorite network in the area—or tell you what stations are in the city or state you are in. If you enjoy pulling in distant stations (DX'ing), this book will help you identify each signal quickly. For the radio and television time buyer and others engaged in broadcasting activities, this book serves myriad uses. Each entry has been checked and rechecked, and the book listings computer-compiled, making this the most accurate and up-to-date guide available.

## ABOUT THE AUTHOR

Vane Jones is engaged in many activities, but his first love is this book. Whenever possible, you will find him in his study, with a television set and two or three radios all operating at once. He can recite call letters and tell you the history of stations by the hour. Since the publication of his first station guide in 1958, his list of followers has grown with each edition, primarily because of the personal attention he gives each entry and the hairline accuracy for which he is famous.
